DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

ART REJECTION:

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3,6-14, and 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Gershenfeld et al(6,025,725).

-- In considering claims 1-2, the claimed subject matter that is met by Gershenfeld et al(Gershenfeld) includes:

1) the contact-less identification tag is met by the resonator(100);

2) the capacitor is met by the capacitor(C) of the L-C tank circuit;

3) the means for varying the electrostatic capacity in accordance with externally applied compression force is met by the electrically active dielectric material(10, column 6, lines 55 et seq; column 7, lines 1-10).

-- With regards to claim 3, the resonant circuit with antenna coil is met by the LC resonator package including LC resonator including coils(32,34);

-- Claims 6-13 are met by the dielectric which responds to compression force in order to change the electrostatic capacity(see: column 6, lines 1 et seq).

Art Unit: 2612

-- Claim 14 recites subject matter that is met as discussed in claim 1 above.

-- Claims 16-19 recite subject matter that is met as discussed in claims 6-13

above(see: column 6, lines 1 et seq).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gershenfeld et al(Gershenfeld).

-- With regards to claim 4, the examiner takes Official Notice that in the identification tag art, use of data processing section are well known, and therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate a data processing section into the resonator(100) of Gershenfeld, since Gershenfeld already desires to utilize semiconductor chips in the resonator(100)(see: column 7, lines 15-18, and therefore data processing sections are a well known device utilized in semiconductor chips.

Allowable Subject Matter

6. Claims 5 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2612

REMARKS:

Response to Arguments

7. Applicant's arguments with respect to claims 1-19 have been considered but are moot in view of the new ground(s) of rejection.
